

Completing **14 YEARS OF**

Building exceptional software products powered with the latest AI technology. Our suite of products is designed to deliver exceptional value for our customers, minus the typical software complexities and expenses.

Multi-product enterprise SaaS company specializing in enterprise integration and knowledge management space based out of Coimbatore and London.

ABOUT US:

Kovai.co is a technology partner of choice for many of the world's leading enterprises to manage and monitor their Microsoft BizTalk and Azure Serverless environments.

Having grown organically to 3 products, 240+ team members, serving 2500+ customers across the world, Kovai.co's product team consists of thinkers and innovators who are redefining the way impactful, dynamic software products are built.

At Kovai.co we believe in the philosophy of "Together We Grow".

The core guiding principles that drive our team are

Integrity

Our commitment to integrity ensures your confidence in every step, fostering enduring relationships.

Collaboration

By collaborating closely, we amplify strengths and drive innovation, ensuring shared success.

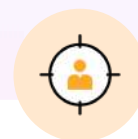

Trust

We understand their critical role in your operations and commit to providing dependable tools.

Customer Obsession

Our commitment to fostering enduring relationships ensures that your success remains our top priority.

Innovation Excellence

We foster a culture of continuous innovation, pushing boundaries and exploring new horizons in technology.

Work Hard! Play Hard!

OUR PRODUCTS:

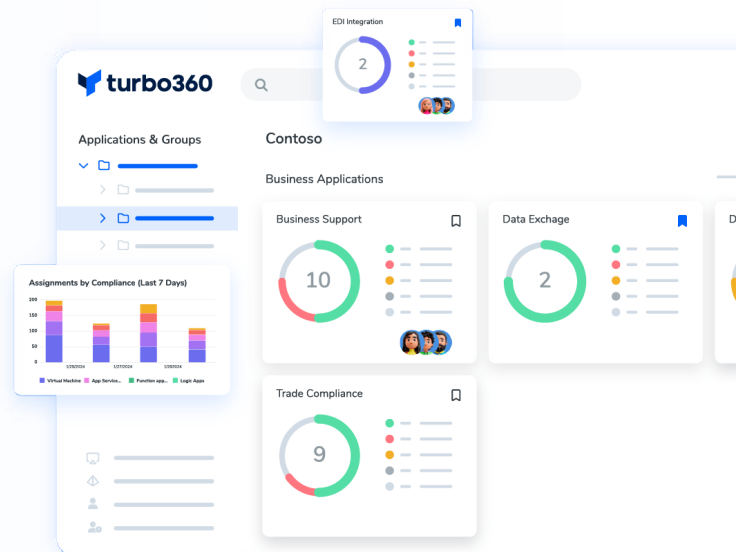

BIZTALK 360

BizTalk360 enhances BizTalk server efficiency and security with over 50 features. These include operations dashboards, widgets, advanced event viewer, data monitoring dashboards, throttling analyzer, and New Relic integration, providing comprehensive tools for effective BizTalk management and administration.

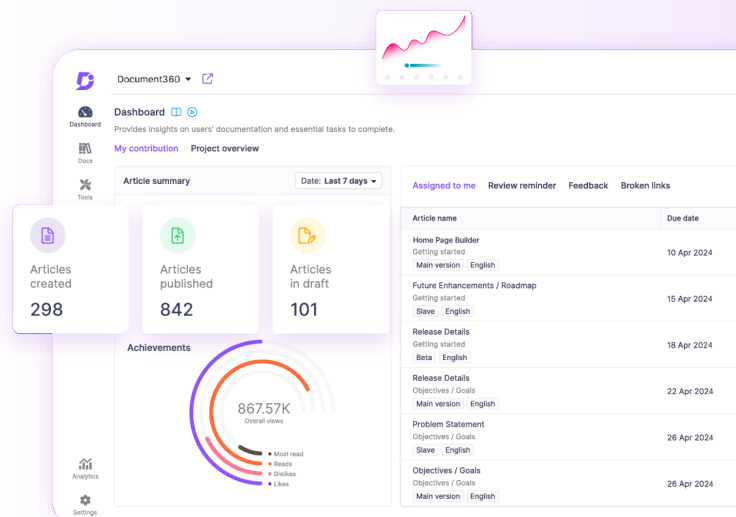

turbo360

Turbo360 optimizes Azure costs, monitors resources, and generates documentation on a single platform. It helps enterprises offload infrastructure management to Azure while addressing gaps in runtime operations and cost management, maximizing application value and minimizing total cost of ownership.

DOCUMENT360

Document360 helps companies build self-service knowledge bases for customers and employees, reducing support costs. Its AI-powered search and authoring tools make it easy to create a helpful knowledge base that improves customer experience.
